Instructor Biography

Hatem OUESLATI
Courses: *Understanding ICAO Annex 14, Safety Management System*

After graduating in 2003 from the French National School of Civil Aviation (ENAC) in Toulouse with a Master's degree in Airport Operations and Air Traffic Management, Mr. Hatem Oueslati joined the Tunisian Civil Aviation Authority where he was appointed Head of the Air Navigation and Airport Safety Department. He was assigned to several projects related to overseeing airport safety including:

- Drafting and reviewing regulation related to the design, planning and operation of airports and heliports.
- Conducting studies and in-site audits to certify or extend the validity of the certificate of the Tunisian international airports,
- Addressing requests for special authorizations regarding obstacle restriction and removal around airports as well as airport infrastructure,
- Studying drafts of safety management systems submitted by the Tunisian airport operators for approval thereafter,
- Establishing the Tunisian State Safety Program and ensuring its update.

He was also appointed National Coordinator for the ICAO USOAP-CMA program and for a Euromed Aviation Project namely Euro-Mediterranean Common Aviation Area.

Hatem has been giving courses and conducting seminars/workshops since 2006 on flight safety, safety management systems, aviation law and ICAO safety related SARPs, at the Tunisian National School of Aviation. Also, he supervised many end-of-study academic projects related to aviation safety and security.

Hatem is currently working for ICAO where he is in charge of managing the execution of technical cooperation projects, including training activities, in Europe and Middle East regions.
