

## SERVICES AVAILABLE

### ONLINE COURSES

Airport specific online training modules in the areas of Safety, Security, Commercial Development and Environmental Management.

### COMPLIANCE MANAGEMENT

Fully managed Learning Management System that manages all training data and provides full tracking, reporting and audit functions.

### CUSTOMISED SERVICES

Development of individually branded learning portals for your Airport including tailored online material such as induction courses for staff and contractors.

## Lighthouse Program

### The low cost, low risk way to introduce Online Training at your Airport.

Online Training represents the greatest opportunity available to day for Airports to reduce their training costs through the use of web based on demand e-learning modules.

Airports Council International has developed the Online Learning Centre e-learning platform to enable all Airports to benefit from e-learning.

The Lighthouse Program provides Airports with a low risk approach to online training and e-learning. By joining the ACI Lighthouse Program airports will receive:

- Free Program Planning and Implementation Support
- 20% discount on all online enrolment fees
- A Free custom course development of up to 60 minutes in length tailored to the airports specification valued at \$7,500

By putting repetitive basic training on-line, Airports can save up to 70% of the existing cost of traditional methods.
