

STATISTICS: TOP 30 WORLD AIRPORTS [by international passengers]

ACI members operate over 1640 airports worldwide – a rich diversity that stretches from the largest international hubs to the smallest airports in remote locations. These airports collectively welcome millions of passengers on a daily basis, which in 2007, meant that 4.8 billion people arrived at and departed from the world’s airports, an increase of 6.8% over 2006. Long-term traffic forecasts predict that, by 2025, that number will double to over nine billion passengers.
